**Status of the Claims**

1. Claims 1-41 are pending in this application.

**Drawings**

2. The drawings filed 6/29/2001 are approved.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 are directed to a system for using a 3D image of a product on the Web, classified in class 345 (computer graphic processing and selective visual display for 3D-object systems), subclass 419.

- II. Claims 8-41 are drawn to a method of operating a product selling system online, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

4. Claiming a method of operating a system, and claiming a system of using 3D images are 2 different inventions.

Inventions I and II are related as system and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to

practice another and materially different process. (MPEP § 806.05(e)). In this case, the claimed system comprises a 3D images database for home designing, or for displaying an automobile at different angles (e.g., an AutoCad library - that do not need a method of use that system for selling 3D products).

5. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose number is 703-305-4553. The examiner can normally be reached on 7am-3:30 pm.
